WORK EXPERIENCE

2017 - to date **Postdoctoral researcher** National Tsing Hua University
Research: data reduction and analysis of ALMA observations of high-mass star forming regions.

EDUCATION

2013 - 2017 **PhD in Astrophysics** University of Leeds
Title: The circumstellar matter distribution of massive young stellar objects
Supervisors: Prof. Melvin Hoare and Prof. Rene Oudmaijer
Findings: Massive young stellar objects may be resolved at $70\ \mu\text{m}$ in Herschel Hi-GAL observations depending on their luminosity and distance.
The extended emission of the massive young stellar object AFGL 2591 observed at $70\ \mu\text{m}$ can be explained by dust emission from the outflow cavity walls.
A disc is needed to explain the 1.3 mm visibilities of AFGL 2591.
Methyl cyanide interferometric observations provide evidence of rotation at envelope scales ($10^3 - 10^4$ au) of AFGL 2591 and is consistent with rotation at disc scales ($< 10^3$ au) detected by other tracers.
The smooth density and velocity distributions given by the Ulrich (1976) model cannot explain all the observations of AFGL 2591 simultaneously.

Thesis link: <http://etheses.whiterose.ac.uk/17246/>

2010 - 2012 **MSc in Astronomy** Universidad de Chile
Title: Physical properties of dense cores using sub-mm observations
Supervisor: Prof. Diego Mardones
Findings: The density distribution of 17 dense cores was modelled as a power law with an average exponent of 1.8, consistent with other studies.
Model masses of the cores are twice as high as those derived by an isothermal approach.

Thesis link: <http://www.repositorio.uchile.cl/handle/2250/110951> (in Spanish)

2005 - 2009 **BSc in Astronomy** Universidad de Chile

CONFERENCES AND SCHOOLS

Conferences

- ALMA2019: Science Results and Cross-Facility Synergies, Cagliari, Italy, October 2019
Poster title: A close-up into the massive YSO SDC335-MM1 with ALMA
- Tracing the Flow: Galactic Environments and the Formation of Massive Stars, Lake Windermere, UK, July 2018
Presentation title: Density, temperature and kinematics of the MYSO AFGL 2591
- Magnetic Fields or Turbulence: Which is the critical factor for the formation of stars and planetary disks?, Hsinchu, Taiwan, February 2018
Poster title: Inner envelope rotation of the massive YSO GL 2591
- Star Formation 2016, Exeter, UK, August 2016
Poster and splinter session presentation: The physical properties of the massive YSO AFGL 2591
- Soul of high-mass star formation, Puerto Varas, Chile, March 2015
Presentation title: The circumstellar matter distribution of the proto-typical MYSO GL 2591
- Postgraduate symposium, University of Leeds, Leeds, UK, April 2014
Poster title: The circumstellar matter distribution of the proto-typical massive protostar AFGL 2591

Meetings & Workshops

- ASROC Annual Meeting, Taipei, Taiwan, September, 2020
Presentation: Looking into the high-mass star-forming core G335.579-0.272 MM1 with ALMA
- East Asia ALMA Science Workshop, Taipei, Taiwan, February, 2020
Presentation: Dissecting the massive YSO G335-MM1: a potential multiple system?
- ASROC Annual Meeting, Taichung, Taiwan, May, 2019
Poster: Density, temperature and kinematics of the massive proto-star GL 2591
- East Asia ALMA Science Workshop, Daejeon, Korea, November, 2017
Presentation: The physical properties of massive young stellar objects

- Northern Star Formation Meeting, Leeds, UK, September, 2016
Presentation: The circumstellar matter distribution of AFGL 2591
- Anglo-French Star Formation Meeting, Leeds, UK, July, 2013
Presentation: Studying the matter distribution of MYSOs with Herschel 70 μm imaging
- ALMA Early Science Users Workshop, Universidad de Chile, May, 2011
- Workshop on Star Formation and Galaxies with Early ALMA, Universidad de Chile, December, 2010
- Workshop on Star Formation: The Pre-ALMA Stage, Universidad de Chile, July, 2009

Schools

- 16th Synthesis Imaging Workshop, Socorro, New Mexico, US, May 2018
- IRAM 30m summer school, Institut de Radioastronomie Millimétrique, Granada, Spain, September 2011

RESEARCH

2017 - to date	Postdoc research	National Tsing Hua University
DIHCA survey of high-mass cores	Data reduction, imaging and analysis of ALMA continuum and molecular line observations of high-mass star forming regions	
ALMA-IMF large program	Data reduction and imaging of molecular clumps forming high-mass stars	
2013 - 2017	PhD research	University of Leeds
Supervisor: Prof. Melvin Hoare		
Analysis and 3-D radiative transfer modelling of multi-wavelength high-resolution continuum and molecular line data of high-mass cores		
2010 - 2012	MSc research	Universidad de Chile
Supervisor: Prof. Diego Mardones		
1-D radiative transfer modelling of submm continuum maps of dense cores		
2011	Short internship	IPAG
Supervisor: Prof. Bertrand Lefloch		
Analysis of IRAM 30m telescope CO data from jet/outflow emission		
2009	Internship	Universidad de Chile
Supervisors: Prof. Diego Mardones and Prof. Guido Garay		
Analysis of the (sub)mm spectral index distribution of dense cores from APEX/LABOCA and SEST/SIMBA maps		
2008	Laboratory	Universidad de Chile
Supervisor: Edgardo Costa		
Spectroscopic distances of nearby stars		
2007	Summer internship	Universidad de Chile
Supervisors: Prof. Diego Mardones and Prof. Guido Garay		
Study of the dust mass and temperature of dense cores from APEX/LABOCA maps		

OTHER EXPERIENCE

Observations

2014 JPS observations at JCMT

2011 ASTE

2011 IRAM 30m summer school

2008 CTIO 1.5m telescope

Teaching

2013 - 2017

University of Leeds

Undergraduate and master's students demonstrator for:

Advanced Experimental Techniques and Analysis (7 terms)

Computing 2 (2 terms)

Physics Laboratory for Geophysicists (1 term)

2009–2012

Universidad de Chile

Teaching assistance work for undergraduate students:

Introductory Astronomy (5 terms)

Stellar Astrophysics (2 terms)

Outreach

- Monitor for the Leeds Light Night 2015
- Guide at the Observatorio Astronomico Nacional (Chile) diurnal and heritage days activities.

IT SKILLS

Astronomical CASA (intermediate), AIPS (basic), CLASS (basic), IRAF (basic)

Languages Python (advanced), IDL (intermediate), C (intermediate), Java (basic), FORTRAN (basic)

Radiative transfer Hyperion, Mollie, LIME, DUSTY, RADMC-3D

Others BASH (intermediate), Git (intermediate)

SCHOLARSHIPS

- CONICYT Becas Chile for PhD studies abroad, 2012
- CONICYT-CNRS Grant for attendance to the 6th IRAM 30m Summer School, 2011
- CONICYT Scholarship for Masters studies in Chile, 2011
